CLASS WAR-

I compleatly believe in your ideology of kicking the racists OUT especially the ones who claim they're punx or anarchists. I live in red neck country (Long Beach) and have gotten harrassed numerous times by pigs, but even worse by kids, about my hair (green, bleach) I have seen kids getting beat up because of their race or because they're gay. I've gotten myself beat up by getting in the middle. This must stop! Revelution must occur or we'll ALL self destruct. Into: Animal Rights, ecology, socio-political things. Music: Beefeater, the Crisps, Born Against, DK, Bad Religon, Resistent Militia, Wreckage, Sacred Reich etc.
Please write back. I can always use another pen pal plus I love zines, literature etc. anything to educate myself and the public. Im always interested in gaining info. and killing the motherfuckers that are so ignorant they must judge on skin color.

In revelution-

Shane

The Potato Story

While speaking on the phone to her incarcerated convict husband, the wife tells her husband that she is planning to plant some potatoes in the backyard of their house, but the soil is very hard and she knows it will be a difficult task. The convict husband tells her that under no circumstances should she plant the potatoes because the guns and the money from his last robbery are buried in the backyard and she would never know where not to dig.

A week later, the convict calls home. His wife excitedly tells him that the F.B.I. have been at his house for the past week digging up every inch of the backyard, but they found nothing and gave up their search. The convict husband then tells her, "O.K., now you can plant your potatoes!"
